Vly Road Subdivision

Message

As a person who presently lives on Hanifin Ave., I feel that the commission ignored all the previous input on this development that was given by the public previously. Having access to the development through Chris Place will only exacerbate the difficulties we have leaving our homes and/or parents leaving the school to go to Vly Road. The fire that closed off access to Vly a while back was disturbing, yet you are going to increase traffic where the school parking lot empties onto Lorelee. You have no foliage planned--this will only increase the pollution in our air because there are no trees to absorb the increase in carbon dioxide in the air, and we will be looking directly into the windows of the new homes behind our houses. Also, the maps you have posted have straight line that runs through all the backyards on Hanifin Ave., labeled OH/HO--what does that designate?
