

We, the undersigned, ask the Village of Colonie Planning Committee to require a full Environmental Impact Statement on the proposed 24 house development called the Vly subdivision on land that used to belong to the Capitol Church. We request an environmental review to include; a study of all of the plants, animals, birds, bats, reptiles, amphibians and insects on the property. A delineation of any endangered, threatened or species of special concern, the geology of the property, water run-off, how the development may affect climate change, and sustainability. This undeveloped property is home to an abundance of wildlife, and as such a development will dramatically negatively impact this natural area and the surrounding community.

We are also concerned about the impact on traffic, safety and public services, including Saddlewood Elementary.
